

AMENDMENT TO THE CLAIMS

1. (Currently Amended) A polyurethane article with low ~~emission~~ fogging characteristics obtainable by condensation reaction including the use of metal catalysts wherein said metal catalyst has a low emissivity and is derived from a polyurethane forming reaction mixture containing as a catalyst for the mixture an organotin compound having low emissivity of the general formula

wherein R is methyl and X is a carboxylate group with 14-20 carbon atoms having at least one olefinic double bond.

2. (Currently Amended) The polyurethane ~~Polyurethane~~ article according to claim 1, wherein in said organotin compound X is a carboxylate group derived from a carboxylic acid of the formula:

wherein R' is a C₁₃-C₁₉ hydrocarbyl group having one or more olefinic double bonds.

3. (Currently Amended) The polyurethane ~~Polyurethane~~ article according to claim 1 or 2, wherein said one or more olefinic double bonds are isolated double bonds.

4. (Currently Amended) The polyurethane ~~Polyurethane~~ article according to claim 2 or 3, wherein R' is ~~an aliphatic~~, a substituted or unsubstituted alkenyl group.

5. (Currently Amended) ~~The polyurethane~~ Polyurethane article according to ~~anyone~~ of the preceding claims claim 2, wherein in said organotin compound said hydrocarbyl and/or carboxylate group is a linear group.

6. (Currently Amended) ~~The polyurethane~~ Polyurethane article according to ~~anyone~~ of the preceding claims claim 2, wherein in said organotin compound the carboxylate group is selected from[:] the group consisting of oleate, ricinoleate, linoleate and ~~linoleate~~ linolenate.

7. (Currently Amended) ~~The polyurethane~~ Polyurethane article according to ~~anyone~~ of the preceding claims claim 1, wherein said organotin compound is liquid at room temperature (20-25°C).

8. (Currently Amended) ~~The polyurethane~~ Polyurethane article according to ~~anyone~~ of the preceding claims claim 1, wherein said polyurethane article is a foamed article.

9. (Currently Amended) ~~The polyurethane~~ Polyurethane article according to ~~anyone~~ of the preceding claims claim 1, wherein in the polyurethane forming reaction mixture comprises an foam is derived from isocyanate and a polyol ~~aliphatic isocyanate~~.

Claims 10-11 (Cancelled).

12. (New) The polyurethane article according to claim 9, wherein the polyol is selected from the group consisting of polyether polyols, polyester polyols and mixtures thereof.

13. (New) The polyurethane article according to claim 8, wherein the polyurethane forming reaction mixture comprises an aliphatic isocyanate and a polyol.

14. (New) A process for preparing a polyurethane article having low fogging characteristics comprising the step of reacting simultaneously or sequentially an isocyanate with a polyol in the presence of an organotin compound having low emissivity of the general formula

wherein R is methyl and X is a carboxylate group with 14-20 carbon atoms having at least one olefinic double bond.

15. (New) The process according to claim 14, wherein in said organotin compound X is a carboxylate group derived from a carboxylic acid of the formula:

wherein R' is a C₁₃-C₁₉ hydrocarbyl group having one or more olefinic double bonds.

16. (New) The process according to claim 14, wherein in said organotin compound the carboxylate group is selected from the group consisting of oleate, ricinoleate, linoleate and linolenate.

17. (New) The process according to claim 14, wherein said organotin compound is liquid at room temperature (20-25°C).

18. (New) The process according to claim 14, wherein said polyurethane article is a foamed article.

19. (New) The process according to claim 14, wherein the step of reacting is a condensation reaction.

20. (New) An interior lining contained within a motor vehicle, the interior lining comprising the polyurethane article of Claim 1.

21. (New) An interior lining contained within a motor vehicle, the interior lining comprising the polyurethane article of Claim 6.

22. (New) An interior lining contained within a motor vehicle, the interior lining comprising the polyurethane foam of Claim 8.
